Webinar on informing the teachers of ASPnet schools and beyond about the globally collected best practices as part of the survey

"TECHNICAL AND EDUCATIONAL CHALLENGES, CAPACITIES AND READINESS OF SCHOOLS TO USE THE POTENTIAL OF DIGITAL INNOVATIONS AND AI."

Provisional Agenda

In the face of the pandemic, many educators were forced to creatively approach the educational process including with the implementation of various ICT tools, both in order to ensure that the learning is taking place and to track progress of the learners, while simultaneously trying to keep 'digital balance' not to overburden the learners (and themselves) with too many applications and constant need for online presence. Many have thought of various innovative approaches and uses of widely-spread ICT tools, and yet, there definitely is a striking diversity in the challenges that educators across the world faced due to varying levels of informatization in different countries and level of ICT knowledge among the educators across the world.

UNESCO IITE and Huashi Education Group's (HEDU) joint project entitled 'Connecting schools online for inter-cultural teaching and learning') enables schools worldwide not only to receive information about the way education is organized and delivered, but also to play a more pro-active role in preparing students, teachers, parents and local communities not only for the present but equally for the future. The project is fully supported by APSnet. The webinar intends to familiarize a wider audience of educators from around the world with the best practices on teaching and learning using ICTs which were collected globally in 2022-2023.

Target audience

Educators (secondary to high school teachers of ASPnet schools and beyond) teaching different subjects (e.g., Mathematics, English, Social Sciences) are the target audience for the webinar. The working language of the webinar is English.

Access to the webinar

The registration form is available here.

Tuesday 13 June 2023	
10:00 – 10:05 (CET)	**Opening remark and welcome address** **Ms. Natalia Amelina, Chief of Department of Teacher Professional Development and Networking, UNESCO IITE**

10:05 – 10.15 (CET)	**Opening remark and welcome address** **Mr. Rembert Jonckheere, Consultant, Unit for the UNESCO Associated Schools Network (ASPnet)** **Division for Peace and Sustainable Development, Education Sector**
10:25 – 10:40 (CET)	**Presentation (10 min) and discussion (5 min)** **Ms. Stephanie Yvart, Mathematics Teacher, Coordinator of Mathematics teachers at Lycée International de Saint-Germain-en-Laye;** **Mr. Florent Emy, Philosophy and Humanities, Coordinator of Philosophy Teachers at Lycée International de Saint-Germain-en-Laye, Coordinator for the Erasmus partnership and the UNESCO associate school system.**
10:40 – 10:55 (CET)	**Presentation (10 min) and discussion (5 min)** **Mr. Alexander Giglavy, Director for Research and Development, Moscow Lycee No 1533 (Information Technologies)**
10:55 – 11.10 (CET)	**Presentation (10 min) and discussion (5 min)** **Mr. Dioges Peres, Physicist, Educator, School Management Specialist, TECH enthusiast, Director at Colégio Antares (Brazil).**
11.10 – 11.30 (CET)	**Discussion** **Participants: the speakers and the webinar audience** **Moderator: Ms. Tatiana Shutova, UNESCO IITE Programme Specialist**
